EXAMINER'S ACTION

Art Unit: 3305

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-6 are rejected under 35 U.S.C. § 102(e) as being clearly anticipated by Tan.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 7-11 are rejected under 35 U.S.C. § 103 as being unpatentable over Tan in view of Obagi. The Obagi reference teaches that short exposure to light is beneficial to psoriasis. In view of this teaching, it would have been obvious to one skilled in the art to apply light as disclosed by Tan to psoriatic areas for treatment thereof.

The Sinofsky, Trokel and Diamantopoulos references are cited as disclosing laser treatment devices.
